🌍 Minecraft Server Player Setup Guide: Survival and Creative

This guide provides detailed instructions for players on how to join the **Survival and Creative** servers, including domain-based and direct IP connections. It also includes installation instructions for Bedrock players using **Geyser**, setting up voice chat, and using server commands.

You must sign up with the form before you are able to play

You will also be added to the discord if you provide a discord username :D

🔗 Connection Information

Java Edition (Minecraft: Java Edition 1.21.4)

Players can connect using either the custom domain names or direct IP + ports:

- **Survival:** `survival.ombminecraftserver.com` (**Backup:** `51.81.209.158:25565`)
- **Creative:** `creative.ombminecraftserver.com` (**Backup:** `51.81.209.158:25566`)

Dynmap Live Maps

View live maps of each server at:

- **Survival Dynmap:** map.survival.ombminecraftserver.com
- **Creative Dynmap:** map.creative.ombminecraftserver.com

🎮 Bedrock (Geyser) Player Connection

Bedrock Edition players can join the servers using **Geyser**, allowing crossplay with Java Edition servers.

1. Open **Minecraft: Bedrock Edition** (PC, Console, or Mobile).
2. Click **Play → Servers → Add Server**.
3. Enter the following details:
   - **Server Name:** `Omb Minecraft Server`
   - **Server Address:** `51.81.209.158`

- ○ **Port:**
  - ■ **Survival:** 19132
  - ■ **Creative:** 19133
4. Click **Save** and join the game.

🛠️ Mod & Plugin Features

All servers use **Fabric 1.21.4 (Survival & Creative) / 1.21.1 (Cobblemon)** with the following features:

- 🧭 **Commands:** /home, /tpa, /spawn, /rtp, /back
- 🗺️ **Live Map:** /dynmap
- 🎤 **Proximity Voice Chat:** /voicechat
- 🛡️ **Claims & Party System:** /openpac-claim, /openpac-party
- 👥 **Crossplay Support (Geyser)**: Bedrock players can join Java servers.

🎤 Proximity Voice Chat Setup (Simple Voice Chat)

The server uses **Simple Voice Chat**, allowing players to talk in-game with **proximity chat**.

🎧 Installation for Players

1. **Download the Mod**
   - ○ Go to Modrinth or CurseForge.
   - ○ Move the **Voice Chat .jar** file into your Minecraft **mods** folder.
2. **Configure & Use**
   - ○ Join the server and press V to **toggle voice chat**.
   - ○ Adjust settings in **Options > Voice Chat**.

🛠️ Server Commands

📜 General Commands

Command	Description

Command	Description
/spawn	Teleports to spawn.
/home	Teleports to your home.
/home set	Sets your home location.
/tpa <player>	Sends a teleport request to a player.
/tpaccept	Accepts a teleport request.
/openpac-claim	Protects land from griefing.
/openpac-party	Creates a party for group gameplay.
/rtp	Randomly teleports in the world.

🗺️ Dynmap Commands

Command	Description
/dynmap show	Shows player on the map.
/dynmap hide	Hides player from the map.

🎤 Voice Chat Commands

Command	Description
/voicechat	Opens the voice chat settings.
/mute <player>	Mutes a player.

🚀 How to Join the Server 🚀

All servers are **whitelisted** for security. Players need to be added to the whitelist before joining.

1. Ensure you're using **Minecraft 1.21.4 (Survival & Creative) or 1.21.1 (Cobblemon)**.
2. Use the **custom domain names** or **backup IP + port** to connect.
3. Once whitelisted, restart Minecraft and join the server.

🎉 Enjoy 🎉

Welcome to the official **OMB Minecraft Server**!
